Security Products and Partnerships

CarbonHelix

CarbonHelix, our partner, works with organizations to improve attack detection and incident response, harden defenses, and simplify application access without compromise. The CarbonHelix team has deep security experience in a range of industries.

Cisco

As the largest enterprise cybersecurity company in the world, we lead the way with solutions that are driving the industry in SASE, XDR, and zero trust. Integrating it all is Cisco SecureX, our security platform that provides simplicity, visibility and efficiency across your security infrastructure.

Cloud Range

Prepare your SOC Analysts and Incident Responders with Cloud Range's detection, response, and remediation training exercises. Using real tools from the world's leading technology manufacturers on a real virtual enterprise network, your team will be prepared to win every time.

Crowdstrike

CrowdStrike protects the people, processes and technologies that drive modern enterprise. A single agent solution to stop breaches, ransomware, and cyber attacks—powered by world-class security expertise and deep industry experience.

F5

F5 Networks, Inc. is a multinational American company which specializes in Application Delivery Networking technology that optimizes the delivery of network-based applications and the security, performance, availability of servers, data storage devices, and other network resources.

Fortinet

Fortinet is an American multinational corporation that develops and sells cybersecurity solutions, such as physical firewalls, antivirus software, intrusion prevention systems and endpoint security components.

HCL Bigfix

The HCL BigFix endpoint management platform gives IT Operations teams the power of Continuous Compliance and Intelligent Automation to manage over 100 operating system versions, enabling streamlined management processes, tool consolidation and reduced operating costs.

IBM

IBM Security offers one of the most advanced and integrated portfolios of enterprise security products and services. The portfolio, supported by world-renowned IBM X-Force research, provides security solutions to help organizations drive security into the fabric of their business so they can thrive in the face of uncertainty.

Kudelski

Kudelski Security is an innovative provider of intelligent, tailored cybersecurity solutions to a growing base of global enterprises and public sector institutions. With thousands of patents worldwide, we leverage a rich heritage of innovation, which drives the development of our offerings and provides the platform to create and deliver solutions to the world's toughest cybersecurity challenges.

Microsoft

Microsoft empowers your organization's defenders by putting the right tools and intelligence in the hands of the right people. Get insights across your entire organization with our cloud-native SIEM, Microsoft Sentinel. Use integrated, automated XDR to increase efficiency and effectiveness with Microsoft 365 Defender and Microsoft Defender for Cloud. Defend against modern attacks with cloud-native SIEM and XDR.

Proofpoint

More than 90% of targeted attacks start with email, and these threats are always evolving. Proofpoint Targeted Attack Protection (TAP) stays ahead of today's attackers with an innovative approach that detects, analyzes, and blocks advanced threats before they reach the inbox.
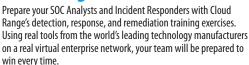

Red Hat

Automation helps IT organizations manage hybrid cloud environments quickly and efficiently. Red Hat Ansible Automation Platform is a simple yet powerful automation solution that delivers agility and flexibility, no matter where your team is on its automation journey.

Risksense

Enrich your infrastructure to application security findings with advanced vulnerability intelligence that delivers concise adversarial risk-based prioritization. Achieve end-to-end comprehensive oversight of vulnerability exposure tracking and remediation validation.

SentinelOne

More Capability. Less Complexity. SentinelOne is pioneering the future of cybersecurity with autonomous, distributed endpoint intelligence aimed at simplifying the security stack without forgoing enterprise capabilities. Our technology is designed to scale people with automation and frictionless threat resolution.

Thycotic

We make enterprise-grade privilege management accessible for everyone by eliminating the need for complex security tools and prioritizing productivity, flexibility and control. You'll achieve more with Thycotic than with any other privilege security tool.

Virtual Armour

VirtualArmour (VA) is a global Managed Security Services Provider (MSSP) that delivers custom security services tailored to meet the needs of our clients. VA manages the entire security lifecycle, from initial alerting, to the investigation phase to resolution.

ABMartin

Unstructured Data Masking Completing the Compliance Circle by masking unstructured data.

Blackridge

BlackRidge Transport Access Control (TAC), using patent¬ed First Packet Authentication™, provides a new level of cyber defense for network and cloud resources.

Cybereason

Cybereason is an advanced endpoint detection and response platform. The platform collects and analyzes millions of pieces of data every second and builds an ever-evolving picture of your environment.
